

AMSOIL *SERIES 2000*

Octane Boost

Improves performance in all two-cycle and four-cycle gasoline-fueled engines

AMSOIL Series 2000 Octane Boost improves the performance of all two-cycle and four-cycle gasoline-fueled engines. Just one treatment significantly increases engine response and power.

AMSOIL Octane Boost reduces engine knock, improves ignition, helps fuel burn cleaner and inhibits corrosion.

AMSOIL Octane Boost is the recommended octane boost for all high-performance off-road and racing applications. Corrosion inhibition is also important in the storage of high-performance vehicles.

Most users will find one 12-ounce bottle of AMSOIL Octane Boost for 15 gallons of gasoline provides the ideal performance increase.

AMSOIL Octane Boost is also excellent as a lead substitute at same treat rates in collector automobiles, older off-road equipment and pleasure vehicles.

Danger: Combustible, keep away from sparks and flame. Keep out of the reach of children.
Harmful or fatal if swallowed.

Series 2000 Octane Boost ...

- * Improves performance***
- * Maximizes power***
- * Improves ignition***
- * Helps fuel burn cleaner***
- * Removes carbon deposits***
- * Reduces engine knock***
- * Improves responsiveness***
- * Inhibits corrosion***

Series 2000

When Performance Counts

AMSOIL Series 2000 Octane Boost increases the octane number of gasoline. Feel the power increase with just one treatment!

What does "octane number" mean? Why does it matter?

The tendency of a hydrocarbon fuel, such as gasoline, to knock is measured by its octane number. Lower numbers denote a greater knock tendency; higher numbers denote greater knock control. "Knock" is an uncontrolled and explosive ignition of fuel in the combustion chamber. It causes a knocking or pinging sound, robs the engine of power and, left unchecked, causes serious engine damage. Knock may be eliminated with the appropriate octane number.
